

## Item:Shan tong paulownia seeds cold dry resistant

### Chinese Shan tong paulownia seeds cold dry resistant

<b>Paulownia Species</b>	Paulownia Elongata, Paulownia Tomentosa, Paulownia Fortunei, Paulownia hybrid 9501, Paulownia Shantong, Paulownia hybrid fortunei x tomentosa, Royal and so on.
<b>Breed Routes</b>	Paulownia planting or sapling, Paulownia root cutting, paulownia stump, paulownia rootstock or stem, Paulownia seed and so on

### Get better Paulownia tree pay attention as following

<b>Land</b>	<ol style="list-style-type: none"><li>1. Ground water level: more than 1.5m.</li><li>2. Soil texture: permeability or breathability good loam and sand soil, avoid clay, harden, ventilation adverse soil.</li><li>3. PH of soil, 6-7.5 is the best, 5-8.9 is acceptable.</li><li>4. Good irrigation and drainage system will be better.</li><li>5. Elevation up to 2000m is acceptable</li></ol>
<b>Water</b>	<ol style="list-style-type: none"><li>1. Fecund and wet. No ponding and water saturation</li><li>2. Annual rainfall 400mm-1200mm.</li><li>3. In seedling period, keep the soil with good moisture(20-40%), after grow up than 50cm drought resistant ability improve, then better and better.</li><li>4. attention please: water enough, no ponding, keep soil breathing</li></ol>
<b>Sunshine</b>	<ol style="list-style-type: none"><li>1. Plant paulownia tree in sunny place and keep away from heavy wind.</li><li>2. Try to prohibit paulownia tree under other bigger trees</li><li>3. Density. For seedling using 0.8x1m or 1x1m distance, for forestation 4x4m or bigger distance.</li></ol> Plant with crop distance more than 3x15m.
<b>Temperature</b>	Annual temperature 12-20celsius degree grow better; -20-+45celsius degree is ok, vulnerable to frost damage if absolute temperature less than -25celsius degree.
<b>Fertilizer</b>	At the first, for paulownia seed, paulownia root and paulownia stump, and other paulownia planting, give little fertilizer, and in the future: less quantity fertilizer and much more times.
<b>Breeding Method</b>	<ol style="list-style-type: none"><li>1. For seedling, mainly by Paulownia seed and paulownia root, and the root is the better and common way.</li><li>2. Afforestation: paulownia root, paulownia stump and seedling of one or two years.</li></ol>

<b>Difference of seed and root</b>	<p>Paulownia seed price is lower, but seed very small and light, high technical requirement, and it is hard to get better seedling in one year. Keep genn of original plant not so well, It's easy to have a separation phenomenon.</p> <p>Plant by paulowna root(vegetative propagation ), keep the nature of original species, simple technical, save work and time, get better paulownia tree.</p>
<b>Work Progress</b>	<p>Paulownia seeds: choose quality species tree,disinfection and drying,package and storge.</p> <p>Paulownia root: take root out from soil of one year seedling-then cut them-clean soil- then disinfect with sevral drugs- washing-fumigation-trim-package-fresh keeping storehouse-arrange shipping.</p>

## Features Instruction

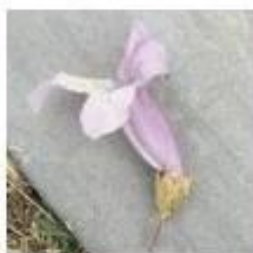

<b>Features of hybrid</b>	<ol style="list-style-type: none"> <li>1. Hybrid by paulownia fortunei x tomentosa, parents are south and north species of Chinese.</li> <li>2. The hybrid species inherited good gene of the both, has good environmental adaptability.</li> <li>3. Fast growth, with medium crown, straight through trunk, small difference between top and end.</li> <li>4. The first 1-3years fast growth of height, the first year 3-5m, the following more than 2-3m per year. From 3-4years height slowly and coarse grow faster, 4-9years is the fast period of thickness. 10years grow slowly and steadily. So the paulownia tree 7-10years mature, up to 0.8-1cbm per tree.</li> </ol>

## FAQ:

### 1. The better way to plant paulownia tree?

**Paulownia root cutting and paulownia stump, especially for new planter.**

### 2. Delivery time?

**From end of Nov. to next April.**

**offer storage service of paulownia root cutting and stumps**

### 3. Is plant paulownia root cutting in land workable?

**Yes, of course. Put whole root in land, firm lightly, cover upside by**

**at least 3-5cm soil.**

**4. Withstand temperature**

**-25-+45 celsius degree growth is ok**

**5. Do paulownia planting need special soil?**

**No, Normal soil is ok.**

**6. water requirement?**

**Paulownia have good dry resistant, expecially height than 50cm.  
no need water them all the time.**

**7. How to get better trunk.**

**Choose better species, for example hybrid, and control lateral buds and trim branches.**

**8 how many years can be use for timber?**

**7-8years matured, you can start cut wood from 5years.**
