

## Kiri seeds with phyto certificate

### Paulownia tree seeds growing fast Paotong

|                       |   |
|-----------------------|---|
| <b>Paulownia type</b> | Paulownia Elongata, Paulownia Tomentosa, Paulownia Fortunei, Shantong, Paulownia fortunei Paulownia hybrid hybrid 9501, Paulownia tomentosa, Royal x and so on. |
| <b>Racer routes</b>   | Paulownia plAnting or saplings, cut, paulownia rootstock of paulownia or Paulownia root, stump, seed and so on Paulownia root                                   |

### Below, it is better to draw attention to the payment of Paulownia tree

|                            |   |
|----------------------------|---|
| <b>Land</b>                | <ol style="list-style-type: none"><li>1. groundwater level: more than 1.5 m.</li><li>2. soil texture: Adobe and sand soil, or inhalation permeablility clay to harden, ventilation, avoid adverse soil.</li><li>3. Terry, 6-7.5 PH best, 5-8, 9 is acceptable.</li><li>4. good irrigation and drainage system will be better.</li><li>5. height up to 2000 m are acceptable</li></ol> |
| <b>Water</b>               | <ol style="list-style-type: none"><li>1. lush and wet. No pond and water saturation</li><li>2. years of rainfull 400 mm-1200 mm.</li><li>3. the period of seedling, Cris (20-40%) good mois with an outline, then grow up to 50 cm to develop drought-resistant ability, then better and better.</li><li>4. Please note: adequate, pond, water, Earth just keep breathing</li></ol>   |
| <b>Sunlight</b>            | <ol style="list-style-type: none"><li>1. sew the paulownia tree sunny location and keep heavy Wind.</li><li>2. other major try to prohibit paulownia tree under the trees</li><li>3. density. Forestation 4x4m or greater distance for distance, 0.8 x1m or using seedlings 1x1m.</li></ol> Plant more crop from 3x15m.   |
| <b>Temperature</b>         | Annual temperature 12-20celsius rating grow better; -20-+45celsius degree ok, if vulnerable to frost damage more absolute temperature-25celsius degrees.  |
| <b>Fertilizer</b>          | At first, the paulownia seed, paulownia root and small fertilizer for planting other paulownia stump and paulownia, give and in the future: less than dung and much more amount of time.  |
| <b>Reproduction method</b> | <ol style="list-style-type: none"><li>1. seedlings by Paulownia to seed and paulownia root and root way better and common.</li><li>2. Afforestation: paulownia root, stump and paulownia seedlings a year or two.</li></ol>   |

|   |   |
|---|---|
| <b>Difference between seeds and roots</b> | <p>Paulownia seed price lower, but the seed is very small and light, highly technical, and within a year, it is difficult to get better seedlings. Gainey is not very good, original plant is to have an easy separation phenomenon.</p> <p>Plant paulownia root ( ) byherbal smear ), the original species, simple technical nature, it's better to save your work and time, paulownia tree.</p> |
| <b>Job progress</b>                       | <p>Paulownia seed quality types of wood, disinfecting and drying, select the package and storage.</p> <p>Paulownia root: root, seedling a year-he was cut off from the soil clean "them-then several drug-washing-Pesticide-disinfected with shipping package – fresh keep trim-tank.</p>   |

## Features teaching

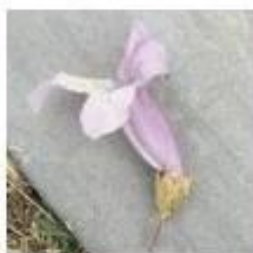

|                           |  |
|---------------------------|--|
| <b>Features of hybrid</b> | <ol style="list-style-type: none"> <li>1. hybrid paulownia fortunei x tomentosa by parents Chinese type are the North and South.</li> <li>2. the hybrid species both good genes is inherited, there are good environmental compliance.</li> <li>3. fast growth, trunk, upper and middle Crown through the small difference between the end.</li> <li>4. the first 1-3years height growth per year more than 2-3 m, 3-5 m, the first year the following fast. 3-4years and slowly grow faster than the height, thickness 4-9 years/quick time. 10years grow slowly and steadily. This is why paulownia tree 7-10years, 0.8-1cbm mature per tree.</li> </ol> |
|---------------------------|--|

#### **FAQ:**

**1. better way to plant Paulownia trees?**

**Paulownia root cutting and paulownia stump, expecially new farm.**

**2. delivery time?**

**From the end of November next April.**

**paulownia root cutting and logs storage survice offer**

**3. plant paulownia root cutting can be applied to his country?**

**Yes of course. Put all the root 3-5 of land, at least slightly firm cm CAP in reverse.**

**4. temperature to withstand**  
**-25-45 degrees Celsius growth**

**5. I need special soil of paulownia planting?**  
**No, it's not a problem in Normal soil.**

**6. water requirement?**  
**Paulownia dry, especially good height 50 cm. you don't have to always have water again.**

**7. how to better housing.**  
**Better type, for example, select the lateral buds and hybrid and control branches to trim.**

**8 how many years could use wood?**  
**7-you can start cutting wood 5years matured, 8years.**
