Anyway, we have more than ten years experience in this market, and got supported from Zhengzhou research center, you can trust us.

Let's talk about how should we collect paulownia roots cutting.

We collect roots cutting from one year old tree, because the tree in this time has higher survive rate, and easier to get the seedlings.

Heze Fortune International Co.,Ltd.

We can get 3-8 pcs roots from one stumps, but for keep their quality, we will choose health ones.

It's a hard work to do, but we insist. The following picture is our roots cutting. Very fresh, right?

As we said above, our roots cutting is very fresh, We will collect the roots within 3 workdays after you made order. And we provide phyto certificate, it's very important for exporting this kind of products to another country.

More information, please contact me.

I am here, I am Anna.

Waiting for your messages.

Best wishes for you.
