

Item:Spring planting paulownia root cut stump hybrid 9501,shantong,elongata,tomentosa,fortunei

Company information:

We are China professional paulownia planter with long experience both planting and exporting about paulownia more than 10 years.

We will send Technical Guidance and Phytosanitary certificate.

Learn more about paulownia	
Paulownia species	Paulownia hybrid 9501,paulownia shantong,paulownia elongata,paulownia fortunei,paulownia tomentosa,royal and so on.
Paulownia seed	Lower pricer,very light and small,high technical requirments,hard to getting better seedlling in one year. We will send a file about how to plant paulownia seed.
Paulownia root/cutting	Simple technical,save work and time,95% survive rate,grows very fast,get better paulownia tree. We will send Technical guidance for free after you confirm the order.
Paulownia stump	Very easy to survive.
Certificate	Phytosanitary certificate
Express we suggest	DHL and EMS,because the roots,seeds and stumps will go to a long trip through different temperature changes,quick express can guarantee the quanlity.

China Fast growing type paulownia hybrid 9501 for afforestation

For getting better paulownia pls pay attention to the follows:

Land	<ol style="list-style-type: none"> 1. Ground water level: more than 1.5m. 2. Soil texture: permeability or breathability good loam and sand soil, avoid clay, harden, ventilation adverse soil. 3. PH of soil, 6-7.5 is the best, 5-8.9 is acceptable. 4. Good irrigation and drainage system will be better. 5. Elevation up to 2000m is acceptable
-------------	---

Water	<ol style="list-style-type: none"> 1. Fecund and wet. No ponding and water saturation 2. Annual rainfall 400mm-1200mm. 3. In seedling period, keep the soil with good moisture(20-40%), after grow up than 50cm drought resistant ability improve,then better and better. 4. Attention please: water enough, no ponding, keep soil breathing
Sunshine	<ol style="list-style-type: none"> 1. Plant paulownia tree in sunny place and keep away from heavy wind. 2. Try to prohibit paulownia tree under other bigger trees 3. Density. For seedling using 0.8x1m or 1x1m distance, for forestation 4x4m or bigger distance. <p>Plant with crop distance more than 3x15m.</p>
Temperature	Annual temperature 12-20celsius degree grow better; -20-+45celsius degree is ok, vulnerable to frost damage if absolute temperature less than -25celsius degree.
Fertilizer	At the first, for paulownia seed, paulownia root and paulownia stump, and other paulownia planting, give little fertilizer, and in the future: less quantity fertilizer and much more times.
Breeding Method	<ol style="list-style-type: none"> 1.For seedling, mainly by Paulownia seed and paulownia root, and the root is the better and common way. 2.Afforestation: paulownia root, paulownia stump and seedling of one or two years.
Difference of seed and root	<p>Paulownia seed price lower, but seed very small and light, high technical requirement, and it is hard to get better seedling in one year. Keep genn of original plant not so well, It's easy to have a separation phenomenon.</p> <p>Plant by paulowna root(vegetative propagation), keep the nature of original species, simple technical, save work and time, get better paulownia tree.</p>
Work Progress	<p>Paulownia seeds: choose quality species tree,disinfection and drying,package and storge.</p> <p>Paulownia root: take root out from soil of one year seedling-then cut them-clean soil- then disinfect with several drugs- washing-fumigation-trim-package-fresh keeping storehouse-arrange shipping.</p>

Features Instruction

Features of hybrid	<ol style="list-style-type: none"> 1. Hybrid by paulownia fortunei x tomentosa, parents are south and north species of Chinese. 2. The hybrid species inherited good gene of the both, has good environmental adaptability. 3. Fast growth, with medium crown, straight through trunk, small difference between top and end. 4. The first 1-3years fast growth of height, the first year 3-5m, the following more than 2-3m per year. From 3-4years height slowly and coarse grow faster, 4-9years is the fast period of thickness. 10years grow slowly and steadily. So the paulownia tree 7-10years mature, up to 0.8-1cbm per tree.

FAQ:

1. The better way to plant paulownia tree?

Paulownia root cutting and paulownia stump, especially for new planter.

2. Delivery time?

From end of Nov. to next April.

offer storage service of paulownia root cutting and stumps

3. Is plant paulownia root cutting in land workable?

Yes, of course. Put whole root in land, firm lightly, cover upside by at least 3-5cm soil.

4. Withstand temperature

-25-+45 celsius degree growth is ok

5. Do paulownia planting need special soil?

No, Normal soil is ok.

6. water requirement?

Paulownia have good dry resistant, expecially height than 50cm. no need water them all the time.

7. How to get better trunk.

Choose better species, for example hybrid, and control lateral buds and trim branches.

8 how many years can be use for timber?

7-8years matured, you can start cut wood from 5years.
